Here is a list of Courses available from Central Bedfordshire Academy of Social Work and Early Intervention

All these are available once you have successfully registered with The Academy online e-learning registration system.

An Introduction to the Autism Spectrum

This course hopes to provide learners with an increased awareness of the main characteristics of behaviour which children on the autism spectrum can commonly display, as well as an understanding of the strategies available to support these.

Understand How to Support Individuals with Autism Spectrum Conditions

This e-learning module aims to provide learners with an increased understanding of the autistic spectrum and offer strategies to support those on it. On completion, learners will have an increased awareness of the main characteristics of behaviour which individuals on the autism spectrum can commonly display as well as an increased understanding of the sensory differences of people on the autistic spectrum.
Childhood Obesity and HENRY

By the time children start school 10% are already obese, and babies who are overweight are 5 times more likely to develop obesity at some point in their lives. The details in this course will give you an extensive look into how the HENRY curriculum tries to combat obesity in children.

Right from the start with Henry

This course is specifically for parents. It has been designed to help parents provide their family with a healthy start to life. It covers healthy lifestyle, healthy weight, healthy eating patterns, addressing food, being active and parenting for a healthy lifestyle.

Confidentiality in the Workplace

This course aims to give an understanding of; what confidentiality is and why it is important, the four key requirements of the Confidentiality model and your role in creating a confidential service.

Health and Safety at Work

All businesses have a legal obligation to ensure that their employees are protected from harm in the workplace. This online Health and Safety course helps you to fulfil legal requirements for providing workplace training; it also promotes staff awareness that can lead to greater efficiency, lower insurance costs and a reduction in lost time.
The Connected Baby Series: Motorways in the Brain - the Processes of Neural Development

This course explains how brains develop and explores questions such as: Why is it that human brains develop after birth? Why are relationships so crucial to their development? It also considers the implications that this neuroscientific information holds for a wide range of society’s challenges, from prisons to education and health. This is the first part of the Connected Baby Series.

The Connected Baby Series: Sabre Tooth Tigers and Teddy Bears: Understanding Attachment

This course will help you understand what attachment is and why it is central to our well-being as well as enabling you to identify attachment processes operating in the lives of children and adults. Learn how to understand how attachment patterns become wired into the brain and know how to help when someone is experiencing anxious ‘attachment moments’. This is the second part of the Connected Baby Series.

The Connected Baby Series: Connection in Action: Seeing Relationships in Everyday Settings

This course shows you what the information we’ve been discussing in the previous modules looks like in children’s everyday lives. You will see numerous examples of the attachment process at work, gain insights into the behaviour signals that can tell you the emotions a child is experiencing and consolidate your knowledge of how to help a child experiencing anxious moments. This is the third and final part of the Connected Baby Series.
Personal Safety for Lone Workers

Personal safety for lone workers is of prime importance. Every day in the UK, thousands of workers will be exposed to situations in which their safety could be put at risk, when they are left alone with customers or other members of the public.

The Essentials of GDPR

The UK has chosen to adopt in full a new key piece of legislation - the EU’s GDPR (the General Data Protection Regulation). This law will apply to all businesses and will enforce new guidelines and new regulations to follow when handling and storing data. It is crucial to ensure your business can comply with this new legislation.

This course is aimed at those involved in the handling of people’s information as part of their day to day role, providing a GDPR overview. Learners will understand the key principles and process under the regulation and what their roles and responsibilities include.
